FINAL ACTION

Status of the Claims

1. This action is in response to papers filed 5 September 2003 in which claims 1, 4, 7 were amended and claims 2-3, 5-6, 8-9 were canceled. All of the amendments have been thoroughly reviewed and entered.

The previous objections and rejections in the Office Action dated 16 January 2003 are withdrawn in view of the amendments. All of the arguments have been thoroughly reviewed but are deemed moot in view of the amendments, withdrawn rejections and new grounds for rejection.

New grounds for rejection are discussed.

Claims 1, 4 and 7 are under prosecution.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Fiekowsky et al (U.S. Patent No. 6,090,555, issued 18 July 2000).

Regarding Claim 1, Fiekowsky et al disclose a DNA microarray comprising a set of features on a substrate, each of the features including multiple copies of single stranded DNA probes of common sequence (Column 6, lines 7-33) and features including positive control probes being included in the set of features, the positive control probes being arranged in a pattern on the microarray to create a symbol (e.g. circle, square or plus sign) recognizable to a human being when illuminated (Column 7, lines 43-63).

Regarding Claim 4, Fiekowsky et al disclose a method for designing a polynucleotide microarray comprising selecting a set of features, each feature including a plurality of polynucleotide probes of identical sequence (Column 6, lines 7-33) and some of the features including probes designed to serve as positive controls and arranging the set of features on a microarray substrate so that the features containing the positive controls, when illuminated form a symbol (e.g. circle, square or plus sign) recognizable to a human being through visual observation wherein the set of features provides a microarray (Abstract and Column 7, lines 43-63).

Regarding Claim 7, Fiekowsky et al disclose a method for detecting whether an event of interest in a biological experiment has occurred comprising providing a DNA microarray comprising a set of features, each feature including a plurality of single stranded DNA probes (Column 6, lines 7-33), the microarray including features intended to serve as positive controls indicating that an event of interest has occurred, the positive controls being arranged in a pattern forming a character (e.g. circle, square or plus sign) recognizable to a human being through visual observation (Column 7, lines 43-63), hybridizing nucleic acids from a sample to the microarray and observing the presence or absence of the visual pattern to determine if the event of interest (i.e. hybridization) has occurred (Column 6, line 59-Column 7, line 63 and Fig. 6-7).

Art Unit: 1634

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

- 5. No claim is allowed.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BJ Forman whose telephone number is (703) 306-5878. The examiner can normally be reached on 6:30 TO 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on (703) 308-1119. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 308-8724 for After Final communications.

Art Unit: 1634

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.

BJ Forman, Ph.D. Primary Examiner
